Personal Profile

I am a Computer Science graduate and growth-focused Technology Professional with experience in Web Development, UI/UX Design, Data Analysis, Digital Marketing, and IT Training. I enjoy using technology to solve real-life business problems and have successfully built systems for real estate, pharmacy, e-commerce, and smart management use cases.

I work with tools such as Python, HTML, CSS, Bootstrap, JavaScript, PHP, MySQL, Excel, and Power BI to design data-driven solutions. I also help individuals and small businesses grow their brands through Digital Marketing and Social Media Management.

Beyond development, I teach and mentor students in Python programming and data analytics, helping them build relevant tech skills and start their career journeys. My goal is to continue building scalable digital solutions while contributing to business growth and digital transformation in Nigeria and beyond.

Education

Bachelor of Science in Computer Science

Federal University of Kashere, Gombe State

Expected Graduation: 2024

Certifications

- Python Programming – EL Academy, Abuja (2023)
 - Python Programming – Coursera (2023)
 - Machine Learning – FreeCodeCamp (2023)
 - Agile Project Management – HP Life Foundation (2024)
 - Introduction to Front-End Development – Meta (2023)
